

(dB(A)) – Available Position Description – Senior Architect

Date: 18.11.2021

Decibel Architecture (dB(A)) are seeking a talented Senior Architect (+8 years) and are offering the opportunity to work on innovative, challenging and extraordinary projects throughout Australia and Southeast Asia.

About us

Decibel Architecture is an international award-winning practice with a culture that is deeply considered, clearly articulated and constructed around our values – to be ethical, ecological and exceptional. Our projects are diverse in scale and sector, range from chandeliers to cities, and include sustainable design, residential, urban planning, cultural, industrial, recreational, tourism and retail. Everything from small filigree carbon fibre structures to national forest eco-resorts, and multi-million-dollar cultural institutions. We have a deep commitment to process and continuous improvement, encouraging our team to learn and grow together to ensure we produce exceptional outcomes. We are committed to experimentation, exploration and excellence in our work, and to testing new ways of seeing and making.

About you

The role is for an experienced Senior Architect who can facilitate a project from concept design through to completion, and assist in managing teams across different phases of design. The successful candidate will possess exceptional leadership qualities to manage and guide their team, whilst working closely with the Conductor. Our ideal candidate will be a committed, energetic and sophisticated design and delivery thinker, who will bring agency and leadership in design quality (and practice) to our studio. The candidate will be challenged in all aspects of the role and will also be provided with professional and cultural learning opportunities and superb, tailored flexibility, whilst becoming an integral part of the dB(A)) legacy.

You need

- strong design sense and passion for outputs and outcomes
- ability to analyse and critically assess problems
- excellent interpersonal and communication skills
- ability to manage workflows, drawings and documents
- strong leadership skills, an ability to guide others, report on progress and plan tasks
- Revit documentation experience and a high degree of software competency
- Rhino skills a plus
- Documentation, detailing and package preparation experience across multi scale projects
- Ability to programme and manage team tasks, leading to successful environments and outcomes
- Adobe Creative Suite advanced
- must be registered architect
- unrestricted working visa required
- Please send portfolio and CV to work@db-a.co (all files to be under 10MB combined)

We offer

- a brilliant and enriching team culture
- career development and internal/external training opportunities
- opportunities to explore personal areas of interest within the architectural arc
- internal design esquisses to sharpen your competitive edge
- project diversity
- flexible/hybrid working arrangements
- a generous parental leave policy
- the opportunity to work on meaningful projects in a supportive and energised environment

Salary and reward are negotiable and will be commensurate with securing the right candidate.

Please do your homework and have a clear understanding of our practice – we are outside the box and seek similar!
